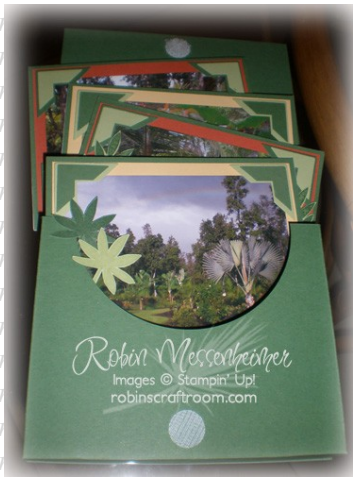
Classic Box for a Stationery Set

This Stationery Set was featured on my Blog on April 30, 2010: [A Perfect Stamp for Paradise]



Supplies Needed

- 12" square card stock or card stock weight Stampin' Up! Designer Series Papers.
- 9-3/4" x 6-1/2" Matching or coordinating card stock/DSP
- Adhesives: Glue Stick and Sticky Strip for box; SNAIL for rest.
- Velcro dots

Supplies Suggested

- Materials to decorate front of box

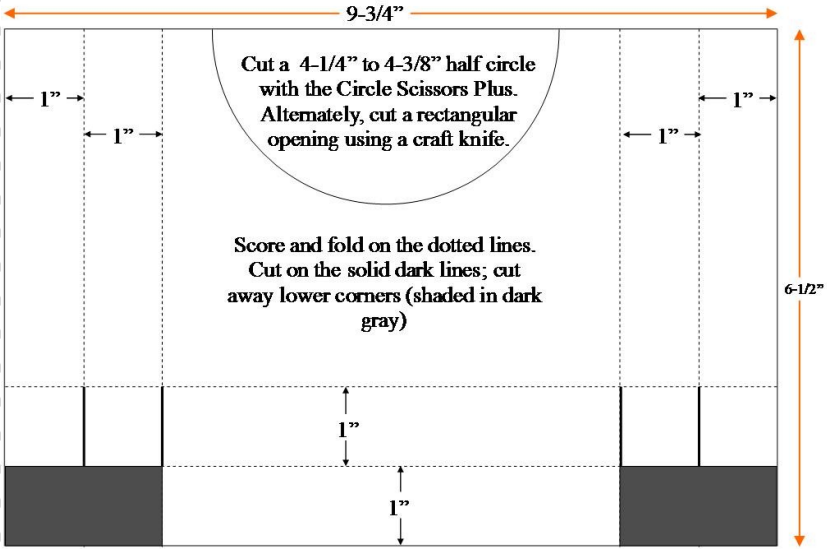
Instructions

Lid

1. Fold 12" square card stock in half and glue together. I like to use Glue Stick and cover the entire inside of card stock with glue. Let dry.
2. Trim folded piece to 10-3/8" in length, then score 4-5/8" from each short end. Fold and crease with bone folder. Decorate as desired.

Box

1. Score the smaller piece of card stock and cut away pieces as shown in the illustration at the right.
2. Fold the left and right sides in to form the sides of the box; fold the bottom up and glue where it overlaps the left and right folded areas. Apply Sticky Strip as shown in the photo below left.



3. Remove Sticky Strip cover and adhere the box carefully to the inside of the lid, as shown below, aligning the bottom edges and centering the box from left to right (there will be about an 1/8" offset between the lid and the box on either side).
4. Remove the adhesive cover from both sides of the Velcro dots and attached the loop side of the set of dots to the lid. Carefully close the lid and allow the hook side of the set to adhere to the box. Carefully unhook the lid and press each side of the Velcro to really set it into the card stock.
