

# The “Never-Ending” or “Endless” Card—Appendix

A Tutorial by Robin Messenheimer, Independent Stampin’ Up! Demonstrator.

Based on the video at [http://www.youtube.com/watch?v=s\\_PP5JY8subo](http://www.youtube.com/watch?v=s_PP5JY8subo)

In the video referenced above, I first demonstrated how I made the Never-Ending card with numbered pieces of card stock. Following are how I numbered and scored each of the four pieces. If you wish to embellish the pieces of your card before putting the card together, I suggest lightly penciling in the numbers and the “front” and “back” designations on your card stock pieces before you decorate them. You will want to make sure that you can see the markings as you are putting the card together! I write from personal experience (and I’d made a bunch of these cards before having the “experience”!).
